Agenda Item 7(d)

CX/PR 18/50/9
February 2018

JOINT FAO/WHO FOOD STANDARDS PROGRAMME CODEX COMMITTEE ON PESTICIDE RESIDUES

50th Session

Haikou, PR. China, 9 - 14 April 2018

REVISION OF THE CLASSIFICATION OF FOOD AND FEED: CLASS C – PRIMARY FEED COMMODITIES TYPE 11 – PRIMARY FEED COMMODITIES OF PLANT ORIGIN Group 050 - Legume feeds Group 051 - Straw, fodder and forage of cereal grains Group 052 - Miscellaneous fodder and forage crops (AT STEP 4)

(Prepared by the Electronic Working Group chaired by the United States of America
and co-chaired by the Netherlands)

Codex members and Observers wishing to submit comments at Step 3 on commodity groups under Type 11 should do so as instructed in CL 2018/14-PR.

Circular letters are available on the Codex webpage/Circular Letters:

<http://www.fao.org/fao-who-codexalimentarius/resources/circular-letters/en>

BACKGROUND

1. Background on the discussion of the revision of the Classification of Food and Feed (CXM 4-1989) can be found in the reports of the 36th – 49th sessions of the Committee on Pesticide Residues (CCPR) including relevant sessions of the Codex Alimentarius (CAC) held from 2004 to 2017.¹
2. One of the terms of reference² (TOR) given to the Electronic Working Group³ (EWG) on the Revision of the Classification by CCPR49 (2017) was to consider the revision of Class C Primary feed commodities. This Class includes Group 050, Legume feeds; Group 051, Straw, fodder and forage of cereal grains and Group 052, Miscellaneous fodder and forage crops. Additional feed commodities developed within the EWG are highlighted in Appendix I and coded as “XXXX” pending assignment of new codes.
3. There was some support in the EWG to delete forage commodities since they are not traded internationally. However it was pointed out that residues in forage commodities are used to calculate livestock dietary burdens with the use of the estimated supervised trials median residue (STMR) and highest residue (HR) values.
4. The existing classification utilizes the term “fodder”. Fodder is a general term that includes hay, straw, silage and other plant products. The proposed revised commodities included in Appendix I have been revised to include more specific terms for animal feeds, such as “hay”, “straw” and “silage”. Added terms are shaded, while removed terms are shown with a strikethrough. References for these commodities included: Guidance Document of Residues in Livestock, OECD⁴ Environment, Health and Safety Publications No. 73 and US EPA⁵ Residue Test Guidelines OPPTS 860.1000, Table I.
5. The European Union (EU) also proposed the creation of a Group in Class C that would include processed feed commodities of plant origin. Typical by-products of processing animal feeds include pomace, pulp, molasses, meal, cannery waste and other by-products.

¹ Reports of Codex committee meetings are available at:

<http://www.fao.org/fao-who-codexalimentarius/committees/committee/en/?committee=CCPR>

² REP17/PR, para. 141

³ The list of participants can be found in CX/PR 18/50/6, Appendix V

⁴ Organization for Economic Cooperation and Development

⁵ Environmental Protection Agency – United States of America

CONCLUSIONS

6. Appendix I of this document presents revised commodity groups under Type 11 of the Classification.
7. The revised type includes a number of additional commodities for Class C (Groups 050, 051 and 052). In addition to new commodities, the Committee should consider the use of more specific commodity terms (hay, straw and silage) to replace the “fodder” terminology used previously.
8. The Committee should also consider the proposal by the EU to create another group within Class C for processed animal feeds and by-products or if these could be incorporated in the existing Classification.

RECOMMENDATION

9. The EWG recommends the Committee to forward the revised groups 050, 051 and 052 to CAC41 (2018) for adoption at Step 5.

APPENDIX I

**CLASS C – PRIMARY FEED COMMODITIES
TYPE 11 – PRIMARY FEED COMMODITIES OF PLANT ORIGIN
(For comments at Step 3)**

CLASS C PRIMARY FEED COMMODITIES

Type	No.	Group	Group Letter Code
11	Primary feed commodities of plant origin		
	050	Legume feeds	AL
	051	Straw, hay fodder and forage of cereal grains and grasses (including buckwheat fodder pseudocereals) (forage)	AF
	051	Straw, hay fodder and forage of cereal grains and grasses (including buckwheat fodder pseudocereals) (straws and hay, fodders dry)	AS
	052	Miscellaneous Hay Fodder and Forage crops (forage)	AV
	052	Miscellaneous Hay Fodder and Forage crops (fodder)	AM

Legume feeds

Class C

Type 11 Primary feed commodities of plant origin Group 050 Group Letter Code AL

Group 050. Legume animal feeds include various species of leguminous plants used for animal forage, grazing, ~~fodder~~ hay or silage, with or without seed. Several species are grown exclusively for animal feeding purposes, whereas some others are grown primarily as food crops. The “waste” parts of the latter crops are often used as animal feed, either in the fresh form or as hay.

The entire commodity may be consumed by livestock animals.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as presented for wholesale or retail distribution.**

In view of the wide range of moisture contents in most animal feeds, except straws, moving in commerce, the MRLs should preferably be set and expressed on a “dry-weight” basis.

A “dry-weight” basis implies that the commodity is analysed for pesticide residues as received, that the moisture content is determined, preferably by a standard method for use on the relevant commodity, and the residue content is then calculated as if it were wholly contained in the dry matter (ref. Report 1980 JMPR¹).

The residues are expressed on a dry-weight basis if not otherwise stated. To avoid confusion caused by the not always consistent commodity description in the past, the “dry-weight” basis, will be indicated, if relevant, with the designation “dry-weight” after the residue figure e.g.

pea vines (green) ; x mg/kg dry weight

pea hay ; x mg/kg dry weight

Group 051 Straw, fodder and forage of cereal grains and grasses, except grasses for sugar production (including pseudocereals)

Class C

Type 11 Primary feed commodities of plant origin

Group 051 Group Letter Code AS (straws and ~~fodders~~ dry hay) AF (forage)

The straw, fodder and forage of cereal grains are derived from various plants of the grass family (*Gramineae*).

Cereal grains are grown to a limited extent as a forage crop. The immature crop is fed to livestock animals as succulent forage or as silage.

The cereal grain crops are mainly grown for human food or raw material for preparing food products. The "waste" parts remaining after harvest of the grain kernels (stems, stalks, leaves and empty ears) are extensively used and distributed for animal feeding purposes, in the form of hay ~~fodder~~ or straw.

Several other species of the grass family are exclusively grown as forages crops. These crops are either used for grazing or are prepared for wholesale or retail distribution in the form of grass silage (in general one or more cuttings from immature plants), ~~as artificially dried grass~~ or as hay.

The entire commodity may be consumed by livestock animals.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity, as presented for wholesale or retail distribution.**

In view of the wide range of moisture contents in the animal feeds of this group, except the straws and hays, moving in commerce the MRLs should preferably be set and expressed on a "dry-weight" basis.

A "dry-weight" basis implies that the commodity is analysed for pesticide residues as received, that the moisture content is determined, preferably by a standard method for use on the relevant commodity, and that the residue content is then calculated as if it were wholly contained in the dry matter (ref. Report 1980 MJPR).

The residues on the dry commodities of this group, e.g. straws and hays, are expressed on the commodity as such (see explanatory note below).

Group 051 Straw, ~~fodder~~ hay and forage of cereal grains and grasses, except grasses for sugar production (including buckwheat fodder)

AS XXXX	Wheat, silage <i>Triticum aestivum</i> L. subsp. <i>aestivum</i>
AS 0654	Wheat, straw and fodder, dry <i>Triticum aestivum</i> L. subsp. <i>aestivum</i> .; Wheat, Durum, <i>Triticum turgidum</i> L. subsp. <i>durum</i> (Desf.) Husn.; Wheat, Einkorn, <i>Triticum monococcum</i> L. subsp. <i>monococcum</i> ; Wheat, Emmer, <i>Triticum turgidum</i> L. subsp. <i>dicoccon</i> (Schrank) Thell.; Wheat, Macha, <i>Triticum aestivum</i> L. subsp. <i>macha</i> (Dekapr. & Menabde) Mackey; Wheat, Oriental, <i>Triticum turgidum</i> L. subsp. <i>turanicum</i> (Jakubz.) Á. Löve & D. Löve; Wheat, Persian, <i>Triticum turgidum</i> L. subsp. <i>carthlicum</i> (Nevski) Á. Löve & D. Löve; Wheat, Polish, <i>Triticum turgidum</i> L. subsp. <i>polonicum</i> (L.) Thell.; Wheat, Poulard, <i>Triticum turgidum</i> L. subsp. <i>turgidum</i> ; Wheat, Shot, <i>Triticum turgidum</i> L. subsp. <i>turgidum</i> ; Wheat, Spelt, <i>Triticum aestivum</i> L. subsp. <i>spelta</i> (L.) Thell.; Wheat, Timopheevi, <i>Triticum timopheevii</i> (Zhuk.) Zhuk. subsp. <i>timopheevii</i> ; Wheat, Vavilovi, <i>Triticum vavilovii</i> Jakubz.; Wheat, Wild einkorn, <i>Triticum monococcum</i> L. subsp. <i>aegilopoides</i> (Link) Thell.; Wheat, Wild emmer, <i>Triticum turgidum</i> L. subsp. <i>dicoccoides</i> (Körn. ex Asch. & Graebn.) Thell.

Explanatory note: Another advantage of expressing the residue on a “dry-weight” basis is that it overcomes the problems arising from the often inconsistent use of the terms forage and ~~fodder~~ hay.

Forage: Crops grown exclusively for animal feed. These crops are either used for grazing or are prepared as silage or as ~~dry fodder~~ hay.

Fodder: Coarse feed for livestock animals, especially cattle, horses and sheep, such as straw, hay, maize, stalks (stover) etc.

e.g. Maize forage: whole green plant, prior to maturity (including the immature or nearly mature cobs).

Maize ~~fodder~~ hay: stover or whole stalks (with ears removed) remaining after the harvest of the mature and sun-dried cobs.

Group 052 Miscellaneous Fodder and Forage crops

Class C

Type 11 Primary feed commodities of Plant origin**Group 052 Group Letter Codes AM (fodder) AV (forage)**

Group 052. Miscellaneous Fodder and Forage crops, are derived from various kinds of plants except leguminous and grassy plants (family *Gramineae*). However, for convenience, the fodders and forage of grasses for sugar production are included in this group. Some of the crops listed in this group are primarily grown for human food or as raw material for preparing food (e.g. sugar beet) and the “waste” material of such crops is used as animal feed.

The entire commodity may be consumed by livestock animals, either in a succulent form, as silage or in the form of dry fodder.

Portion of the commodity to which the MRL applies (and which is analysed): **Whole commodity as presented for wholesale or retail distribution. In view of the wide range of moisture contents in the animal feeds of this group moving in commerce the MRLs should, if relevant, preferably be set and expressed on a “dry-weight” basis, see explanation in Group 050 Legume animal feeds.**

Group 052 Miscellaneous Fodder and Forage crops

<u>Code No.</u>	<u>Commodity</u>
AM 0165	Subgroup of Miscellaneous fodder and forage crops except leguminous and grass plants (<i>Gramineae</i>), but including grasses for sugar production
AM 0660	Almond, hulls <i>Prunus dulcis</i> (Mill.) D.A. Webb
AV XXXX	Arrowleaf balsamroot, forage <i>Balsamorhiza sagittata</i> (Pursh) Nutt.
AM XXXX	Arrowleaf balsamroot, hay <i>Balsamorhiza sagittata</i> (Pursh) Nutt.
AM 0691	Cotton, hulls fodder, dry <i>Gossypium</i> spp.
AM XXX	Cotton, meal <i>Gossypium</i> spp.
AV 1050	Cow cabbage, leaves <i>Brassica oleracea</i> L. var. <i>viridis</i> L.
AM 1051	Fodder beet <i>Beta vulgaris</i> L. subsp. <i>vulgaris</i>
AV 1051	Fodder beet, leaves or tops <i>Beta vulgaris</i> L. subsp. <i>vulgaris</i>
AV 0480	Kale, forage <i>Brassica oleracea</i> L. var. <i>viridis</i> L.
AV XXXX	Kenaf, forage <i>Hibiscus cannabinus</i> L.
AM XXXX	Kenaf, hay <i>Hibiscus cannabinus</i> L.
-	Mangel or Mangold , see Fodder beet, AM 1051
-	Mangoldwurzel , see Fodder beet, AM 1051
AV 1052	Marrow-stem cabbage or Marrow-stem kale, leaves and stems <i>Brassica oleracea</i> L. var. <i>medullosa</i> Thell.

AM 0738	Mint, hay <i>Mentha</i> spp.
AM 0353	Pineapple, fodder process residue <i>Ananas comosus</i> (L.) Merr.
AV 0353	Pineapple, forage <i>Ananas comosus</i> (L.) Merr.
AV XXXX	Spiny hopsage, forage <i>Grayia spinosa</i> (Hook.) Moq.
AV 0596	Sugar beet, leaves or tops <i>Beta vulgaris</i> L. subsp. <i>vulgaris</i>
AM XXXX	Sugar beet, pulp, dried <i>Beta vulgaris</i> L. subsp. <i>vulgaris</i>
AM XXXX	Sugar beet, molasses <i>Beta vulgaris</i> L. subsp. <i>vulgaris</i>
AM 0659	Sugar cane, fodder <i>Saccharum officinarum</i> L.
AV 0659	Sugar cane, forage <i>Saccharum officinarum</i> L.
AV 0497	Swedish turnip or Swede fodder, leaves or tops <i>Brassica napus</i> L. subsp. <i>rapifera</i> Metzg.
AV XXXX	Taper-tip hawk's-beard, forage <i>Crepis acuminata</i> Nutt.
AV XXXX	Threadleaf sedge, forage <i>Carex filifolia</i> Nutt.
AV 0506	Turnip, fodder, leaves and tops <i>Brassica rapa</i> L. subsp. <i>rapa</i>
